Vapor-transmitting protective nonwoven.

Floorliner™ vapor is a nonwoven with a vapor-transmitting PE sheet as a liquid barrier.

It is designed to cover and protect freshly laid floors and enables rising moisture and solvents to evaporate.

As with all products of the Floorliner™ family, a slip-resistant Opticoat™ adhesive coating guarantees an ideal grip and safe working conditions.

Floorliner™ vapor is the ideal protection for your newly laid floors and enables you to carry on working without risk or hazard.

Functions

- ✓ Non-slip for safer sites
- ✓ Breathable; allows solvents and moisture in the flooring to evaporate
- ✓ Impermeable; protects the floor from all kinds of liquid

Applications

- ✓ Ceramic tile and natural stone floors
- ✓ Parquet flooring sealed or oiled on site

ATTENTION: Please observe the minimum drying times defined by the manufacturer before laying Floorliner™ vapor

Features

- ✓ Easy installation and disposal
- ✓ Economic storage (palletized)
- ✓ Adheres to surface
- ✓ Vapor permeable
- ✓ Impermeable to liquids
