

# LANDOLT™

The Swiss specialist for  
temporary surface protection

## Indoor Solutions

## Indoor Solutions

The Swiss nonwoven manufacturer Landolt™ always puts the customer first. It is for this reason that we have developed a broad range of high-quality protection, insulation and safety applications for construction work and interior design.

### 🇨🇭 The Swiss specialist for temporary surface protection

Our focus on Indoor-protection-products and their distribution allowed us to become an European leader. Own production and development create confidence. Specialist dealers and end-users from different construction industries trust in our long experience and quality.

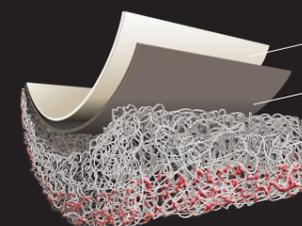

**Protection & Safety** is our ambition to fulfil customer needs with innovative and customized solutions to protect valuable surfaces as well as providing the best work safety at the same time.

We support you in finding the best situational surface solution when you need it the most to protect quality surfaces. From preparation to implementation we support your project. Continuously we work and engage us to finding the best solutions and develop our products. This enables you to concentrate on the essential – Your passion for quality.

«WE PROTECT WHAT YOU CARE FOR»

### An exclusive method: Opticoat™, the permanent anti-slip coating

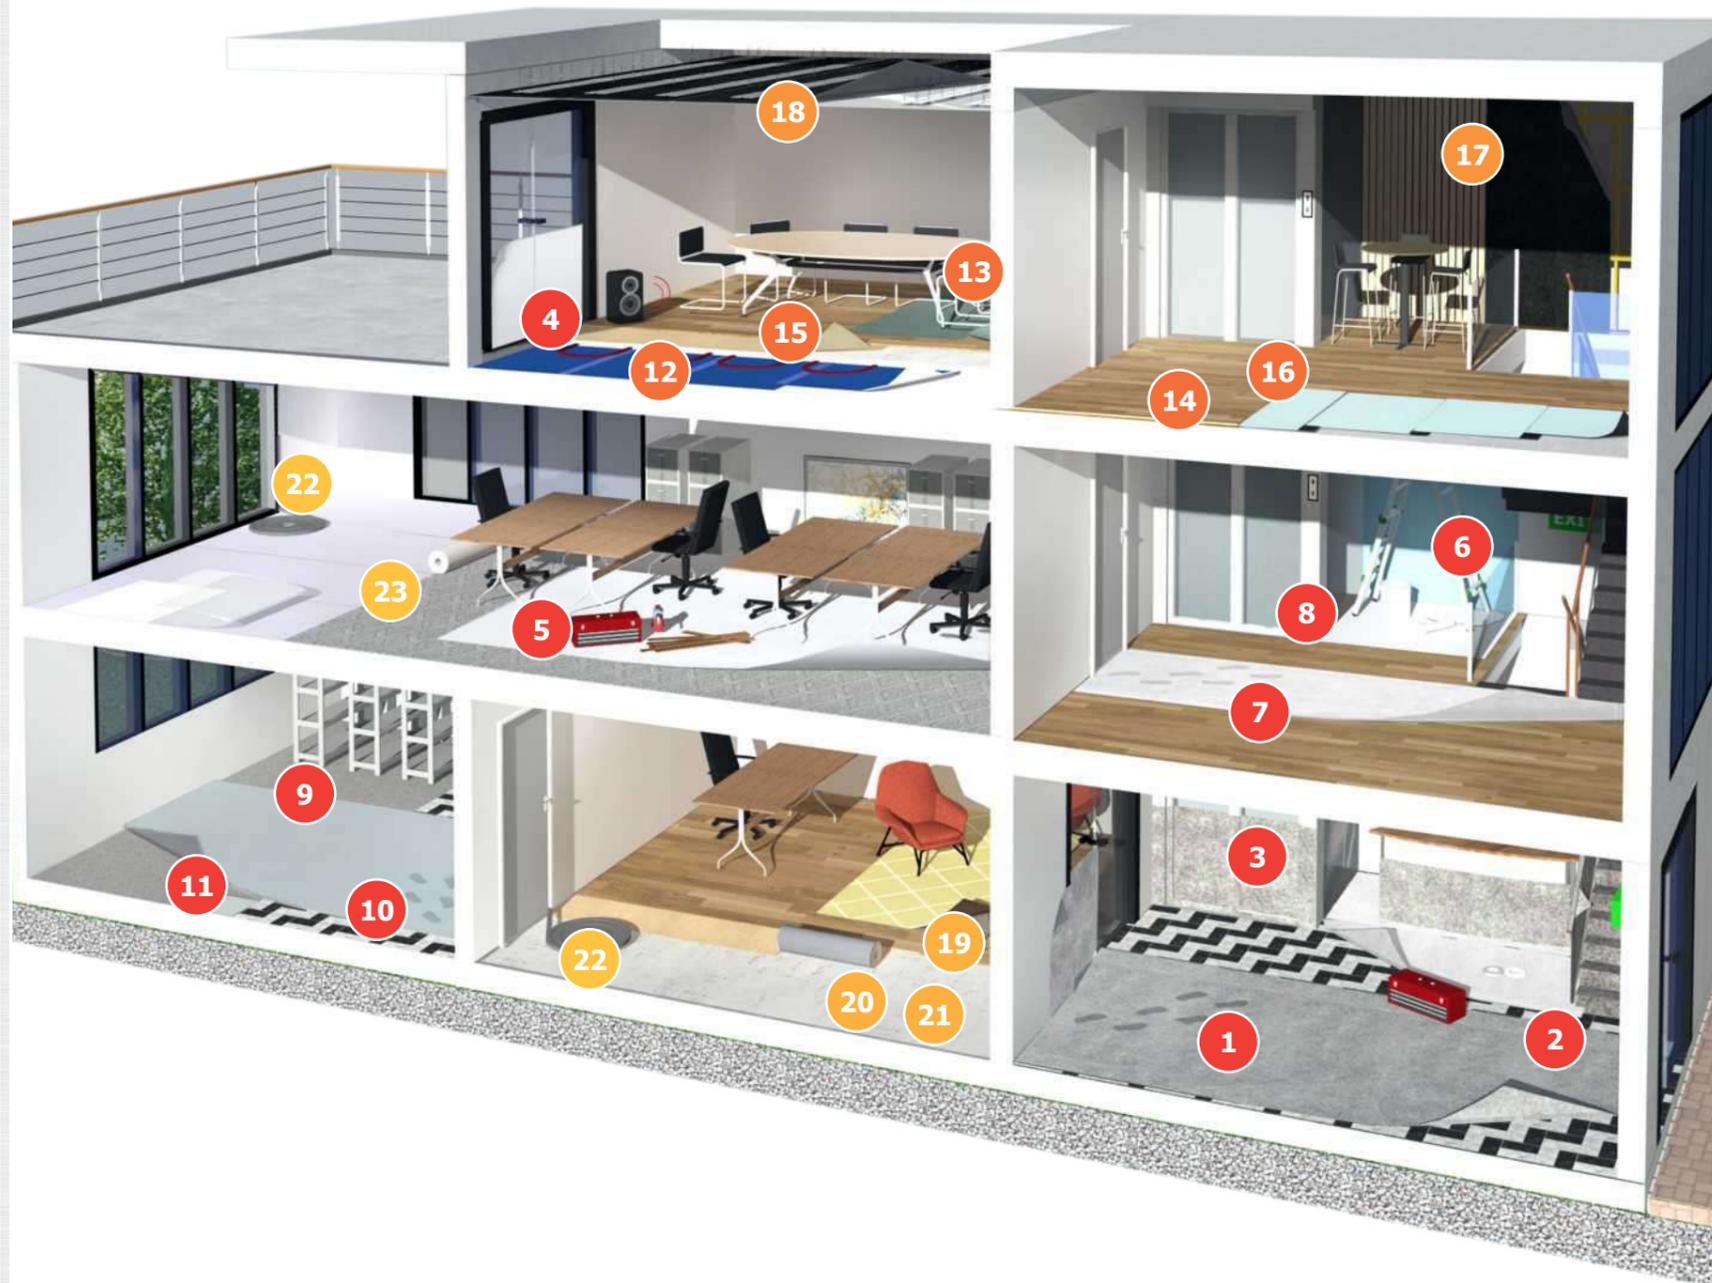

Landolt™ has developed an extremely long-lasting adhesive coating for nonwovens in the form of Opticoat™. Opticoat™ is not an adhesive applied at intervals to the rear side of the nonwoven, but rather a high-tech compound of fibres and adhesive – a permanent and non-sticking anti-slip coating. It is ideal for nonwovens such as Floorliner™ and safety solutions such as non-slip nonwovens for rug underlays.

- Absorbent layer (Floorliner™ absorb only)
- PE sheeting, impermeable to water
- Dense fibre structure
- Opticoat™  
The adhesive coats the fibres to create a deep and durable bond. Result: a non-slip coating that holds tight but never leaves residues.

## LANDOLT™

The Swiss specialist for temporary surface protection

### SURFACE PROTECTION

**ALLPROTECT by Landolt.com™-Family**  
Adhesive component protection for the highest demands  
**Floorliner™-Family**  
Multifunctional surface protection with adhesive coating  
Product numbers: 1-11

P. 6 to 21

### INTERIOR FINISHING Impact sound solutions

**TS™ Family**  
Acoustic protection nonwovens  
Product numbers: 12-16

P. 22 to 28

### INTERIOR FINISHING Acoustic and trickle protection solutions

**Contraphon™ Family**  
Acoustic and trickle protection nonwovens  
Product numbers: 17-18

P. 29 to 31

### INTERIOR FINISHING Carpet slip protection solutions

**Allstop™ Family and Rug-fix™**  
Rug underlays  
Product numbers: 19-21

P. 32 to 36

### SPECIAL SOLUTIONS

**Frivolit™** Insulation material  
Product number: 22  
**Landocol™** Double-sided adhesive nonwoven  
Product number: 23

P. 37 to 39

**ALLPROTECT by Landolt.com™**  
 A hard-wearing, strongly adhesive nonwoven, which withstands highest mechanical stress. As a result of its horizontal and vertical application possibility ALLPROTECT is the ideal solution for stairs and component protection.

**ALLPROTECT by Landolt.com™, the multifunctional component protection.**

Inspired by client feedbacks Fritz Landolt AG developed an adhesive, absorbing nonwoven. The surface consists of hard-wearing nonwoven fabric which soaks up a water or dust and protects the underlying materials. Thanks to its textile surface it is slip-resistant. ALLPROTECT can be removed without leaving a residue and also serves as a liquid barrier.

No matter if highest mechanical protection, for special demands regarding flammability, antistatic and water absorption capacity, or with special attention to flexibility - there is the right ALLPROTECT for every application.

It is suitable for the protection of high quality components as for example stairs, (wooden) floors, walls, ceilings, building element or sensitive surfaces such as lift cabins, doors, windows and glass surfaces.

For long-term applications, as temporary dirt trap or for repeat use.

**For every application the right ALLPROTECT.**

Product Type	Slip-proof	Sticks to everything	No need for adhesive tape	Impermeable/Absorbing	Residue-free	Inseparable	Extra solid	Flexible	Flame-resistant	Anti-static	Protect glass	Printable	Bathroom-Kitchen

Proven nonwoven that meets the highest demands on mechanical protection due to its robustness

Nonwoven for special requirements with regard to flammability, anti-static and water absorbing capacity

Versatile nonwoven with a special focus on flexibility, while providing the expected adhesive effect

Self-adhesive and translucent nonwoven application on vertical surfaces

Legend ● light ● medium ● strong

# ALLPROTECT by Landolt.com™

## Original

**Proven, highly adhesive nonwoven that meets the highest demands on mechanical protection due to its robustness.**

ALLPROTECT Original is the hard-wearing durable, reliable long-term protection, even under heavy mechanical use. The multifunctional all-rounder, which brings something of all important characteristics and can be used so versatile.

**The excellent adhesion allows slip and shear resistance on all substrates.**

### Functions

- ✓ Non-slip surface
- ✓ Safe, very adherent
- ✓ Residue-free on removal
- ✓ Absorbent (high liquid absorption rate)

### Applications

- ✓ Priority on horizontal surfaces
- ✓ Stairs, floor etc.
- ✓ Protection of all common surfaces
- ✓ Temporary dirt trap
- ✓ Long-term protection under high stress

### Features

- ✓ Easy installations
- ✓ Extra solid
- ✓ Slip-proof on the tread surface
- ✓ Shear-resistant on the ground
- ✓ Impermeable and at the same time absorbent

### Certifications and quality controls

### Strengths

- ✓ Protection and safety of the highest quality
- ✓ Usable vertically and horizontally
- ✓ Very adherent (walls, ceilings, floors)
- ✓ Sticks to everything, no need for adhesive tape
- ✓ Residue-free, free of harmful substance

Slip-proof	Extra solid	Sticks to everything
Inseparable	Residue-free	Impermeable/Absorbing
No need for adhesive tape	Bathroom-Kitchen	

For further information  
please see the datasheet at  
[www.landolt.com](http://www.landolt.com)

[www.landolt.com](http://www.landolt.com)

# ALLPROTECT by Landolt.com™

## FR+

**Nonwoven which has been developed for special requirement with regard to flammability, anti-static and water absorbing capacity.**

ALLPROTECT FR+ is flame-resistant and is therefore ideally suited for areas with increased safety requirements. Thanks to its nonwoven structure, it is particularly water-absorbent.

**Ideal combination between effective protection of substrates and fulfilment of special safety requirements.**

### Strengths

- ✓ Flame-resistant
- ✓ Anti-static
- ✓ High water absorption capacity
- ✓ Residue-free

Slip-proof	Impermeable/Absorbing	Extra solid
Residue-free	Inseparable	Sticks to everything
Flame-resistant	Anti-static	No need for adhesive tape
Bathroom-Kitchen		

For further information  
please see the datasheet at  
[www.landolt.com](http://www.landolt.com)

Indoor Solutions, Version 7.0, EN

Indoor Solutions, Version 7.0, EN

**Floorliner™ is an especially dense, puncture-proof nonwoven that protects surfaces from impact, dust and most liquids. Its exclusive, non-slip Opticoat™ coating enables fast and easy installation.**

**Floorliner™, the multi-functional surface protection.**

The Floorliner™ family is the ideal solution for protecting and covering floor surfaces on your building sites. The Floorliner™ family has the right solution to every situation.

Whether breathable, absorbent, flame retardant, extra robust or especially for newly laid floors... there is always a Floorliner™ for any situation.

**The exclusive benefits of the Floorliner™ family.**

The Floorliner™ family is a unique solution. Floorliner™ protects all kinds of floors and furniture.

- > Mechanical protection
- > Liquid protection (water, paint, solvents...)

Floorliner™ products make your building sites safe and reduce the fall hazard thanks to their non-slip Opticoat™ coating.

Floorliner™ products can be used numerous times without losing any protective properties. Floorliner™ products are easy to remove after use and do not leave any residue on the surface.

Floorliner™ products are free from hazardous substances and can be incinerated without emitting toxic gases.

**The right Floorliner™ for each application.**

With the Floorliner™ family, find the right product for all your protection's need.

<b>Floorliner™ original</b>	•	•	•	•	•	•	•	•	•	•
The multifunctional protection and covering nonwoven for multiple use, especially resistant to mechanical influences, of top quality for high demand

[www.landolt.com](http://www.landolt.com)

Indoor Solutions, Version 7.0, EN

## Floorliner™ original is a multi-functional and mechanically resilient nonwoven for the toughest demands.

Floorliner™ original is an especially dense nonwoven with water-impermeable sheeting. It provides ideal protection to floors, even under unfavourable conditions. Its exclusive Opticoat™ adhesive coating makes it easy to lay, remove and reuse on another construction site.

**Floorliner™ original keeps your construction site safe and clean.**

### Strengths

- ✓ Does not slip  
No fixing with adhesive tape
- ✓ Reusable, suitable for mopping and vacuum cleaning
- ✓ Does not pill when mopped
- ✓ No residue on the floor surface
- ✓ Free from harmful substances
- ✓ With adhesive coating Opticoat™

**For further information** please see the datasheet at [www.landolt.com](http://www.landolt.com)

[www.landolt.com](http://www.landolt.com)

### Functions

- ✓ Non-slip for safer sites
- ✓ Impermeable; protects the floor from all kinds of liquids (paint, solvents, ...)
- ✓ Extremely robust and tear resistant
- ✓ Does not pill when mopped

### Applications

- ✓ Tiled floors
- ✓ Parquet, laminate flooring
- ✓ Carpeting
- ✓ Kitchens, work surfaces
- ✓ Ceramics, wetroom facilities

### Features

- ✓ Easy installation and disposal
- ✓ Economic storage (palletized)
- ✓ Robust
- ✓ Adheres to surface
- ✓ Impermeable
- ✓ Environmentally friendly

### Certifications and quality controls

Indoor Solutions, Version 7.0, EN

# Floorliner™ absorb

## Protective nonwoven with reliable absorption properties.

Floorliner™ absorb is a nonwoven with an absorbent yet impermeable layer and an especially dense fleece. It reliably prevents liquids from coming into contact with the floor surface. Floors and furniture are protected from damaging liquids whilst construction work is ongoing.

The surface reliably absorbs liquids and dirt. Its non-slip coating enables safe, hazard-free working.

### Functions

- ✓ Absorbent; protects the floor from all kinds of liquid (paint, solvents, ...)
- ✓ Non-slip for safer sites
- ✓ Does not stick to the floor surface and is easy to remove

### Applications

- ✓ Any kind of floor surface with the exception of floors with a high level of residual moisture

### Features

- ✓ Easy installation and disposal
- ✓ Economic storage (palletized)
- ✓ Adheres to surface
- ✓ Absorbent

### Certifications and quality controls

### Strengths

- ✓ Protects floors and furniture from dirt and liquids whilst providing good mechanical protection.
- ✓ With adhesive coating Opticoat™

Anti-slip

Impermeable

Fuzz resistant

Extra robust

Bathroom-Kitchen

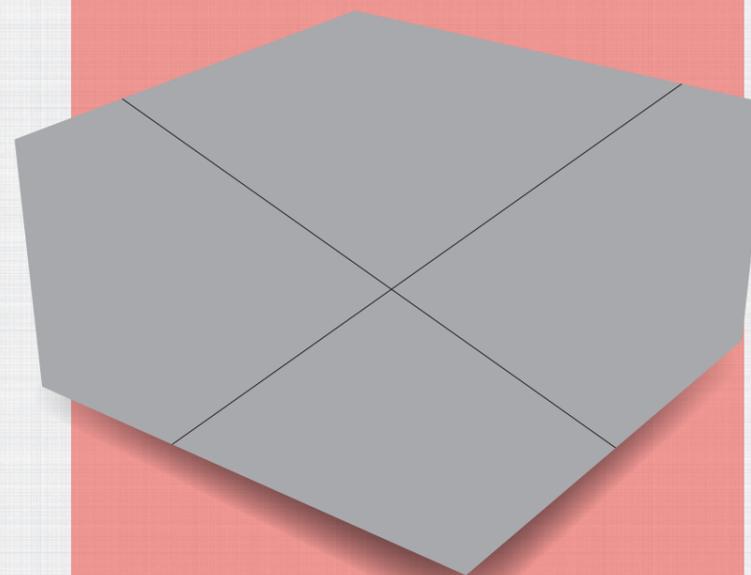

Absorbent

For further information  
please see the datasheet at  
[www.landolt.com](http://www.landolt.com)

[www.landolt.com](http://www.landolt.com)

# Floorliner™ FR

## Flame-retardant protective nonwoven.

The Floorliner™ FR nonwoven is ideal for special applications requiring a flame-retardant function.

Flame retardant in accordance with Bfl s1 / DIN EN 13501-1 and additionally it is wheel mark certified and can be used in the international maritime industry.

Floorliner™ FR is the perfect combination of effective floor protection with strict regulatory compliance.

### Functions

- ✓ High flame retardance
- ✓ Non-slip for safer sites
- ✓ Impermeable; protects the floor from all kinds of liquids

### Applications

- ✓ Any kind of floor surface with the exception of freshly laid or porous floors
- ✓ Maritime applications, e.g.: dock-period, maintenance, reconstruction, etc.
- ✓ For use during constructions

### Features

- ✓ Easy installation and disposal
- ✓ Economic storage (palletized)
- ✓ Adheres to surface

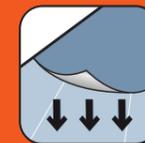

### Certifications and quality controls

Fire index number  
Bfl s1/DIN 13501-1

### Strengths

- ✓ Fulfills international maritime organisation (IMO) regulations
- ✓ Fulfills European fire prevention regulations for building and construction
- ✓ Anti-slip bottom due to Opticoat™-coating

Anti-slip

Impermeable

Fuzz resistant

Extra robust

Bathroom-Kitchen

Fire resistant

please see the datasheet at  
[www.landolt.com](http://www.landolt.com)

[www.landolt.com](http://www.landolt.com)

# Floorliner™ basic

## Lightweight nonwoven with numerous uses

Floorliner™ basic is a quality nonwoven with a waterproof surface. It is the ideal solution for short-term protection where significant mechanical impact is not a risk factor.

Floorliner™ basic provides effective protection at an outstanding quality-price ratio.

### Functions

- ✓ Non-slip for safer sites
- ✓ Impermeable; protects the floor from all kinds of liquids (paint, solvents, ...)

### Applications

- ✓ Tiled floors
- ✓ Parquet, laminate flooring
- ✓ Carpeting
- ✓ Kitchens, work surfaces
- ✓ Ceramics, wetroom facilities

### Features

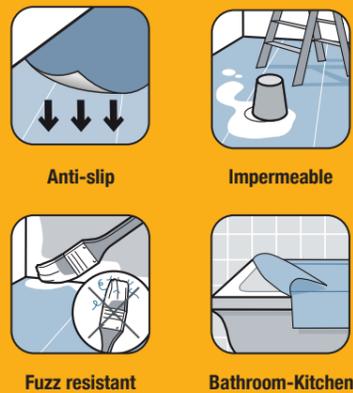

- ✓ Easy installation and disposal
- ✓ Economic storage (palletized)
- ✓ Adheres to surface
- ✓ Impermeable

### Certifications and quality controls

### Strengths

- ✓ With adhesive coating Opticoat™
- ✓ Outstanding quality-price ratio

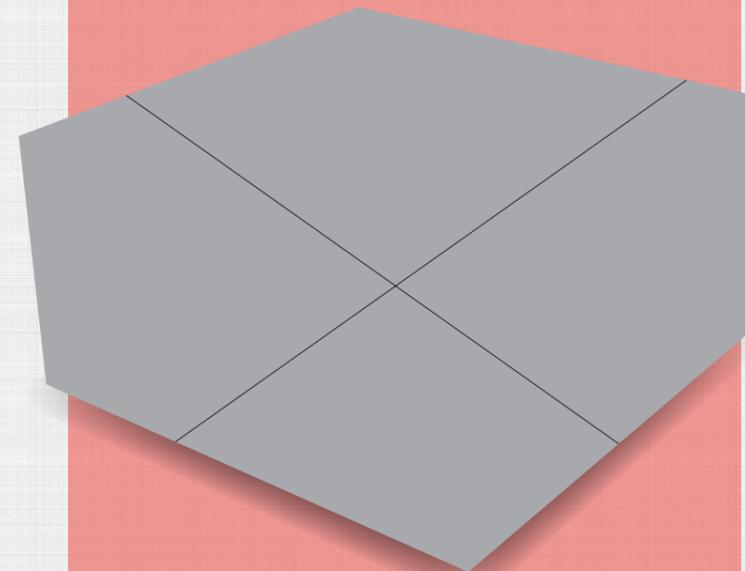

**For further information**  
please see the datasheet at  
[www.landolt.com](http://www.landolt.com)

[www.landolt.com](http://www.landolt.com)

# Solprotec™

## The nonwoven for freshly laid floor coverings

Solprotec™ is a nonwoven with a porous protective coating on the top surface: the ideal solution for freshly laid floors.

Its breathable, vapor-transmitting fleece reliably protects your floors from mechanical damage.

### Functions

- ✓ Non-slip for safer sites
- ✓ Breathable

### Applications

- ✓ Ceramic tile and natural stone floors
- ✓ For floors with high residual moisture

### Features

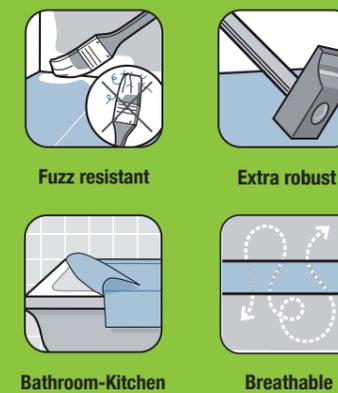

- ✓ Easy installation and disposal
- ✓ Economic storage (palletized)
- ✓ Permeable to water and vapor

### Certifications and quality controls

### Strengths

- ✓ Breathable protection
- ✓ Reusable

**For further information**

[www.landolt.com](http://www.landolt.com)

[www.landolt.com](http://www.landolt.com)

The sound-absorbing products of the TS™ family for parquet and laminate flooring were developed specifically to absorb impact sound and for high convenience.

All products of the TS™ family are highly sound absorbent, suitable for infloor heating, dimensionally stable and permanently elastic. They are easy to lay, resistant to micro-organisms, efficient and durable.

<b>TSP™ 220</b>	•	•	•	•	•	•
Impact-sound absorbing nonwoven, 3 mm thick, for floating laminate floors and parquet with unplanned, rough rear side						
<b>TSL™ 400</b>	•	•	•	•	•	•
Impact-sound absorbing nonwoven for floating parquet and laminate floors with integrated moisture barrier						
<b>TSS™</b>	•	•	•	•	•	•
Impact-sound absorbing product without integrated moisture barrier for floating parquet and laminate floors						
<b>TSSP™</b>	•	•	•	•	•	•
Impact-sound absorbing product with integrated moisture barrier for floating parquet and laminate floors, for greater convenience						
<b>TSU™ 550</b>	•	•	•	•	•	•
Impact-sound absorbing nonwoven for floating supporting floors with laminated-on protective sheet overlapping on one side						

# TSP™ 220

**TSP™ 220 is a thermal and chemical bonded nonwoven with a slip coating and a thickness of 3 mm.**

The upper side has a slip coating for fast and efficient installation of floating parquet and laminate flooring. The nonwoven complies with EN ISO 717-2.

### Functions

- ✓ Reduces impact sound
- ✓ Sound absorbent
- ✓ Vapor permeable

### Advantages

- ✓ Easy to lay
- ✓ Fast installation (no adhesives)
- ✓ Fast installation thanks to a special slip coating on the surface

### Certifications and quality controls

### Strengths

- ✓ Lw = 20 dB
- ✓ Suitable for infloor heating
- ✓ Greater convenience

**For further information**  
please see the datasheet at  
[www.landolt.com](http://www.landolt.com)

[www.landolt.com](http://www.landolt.com)

Indoor Solutions, Version 7.0, EN

# TSL™ 400

**TSL™ 400 for even more convenience.**

TSL 400™ is thicker than TSL™ 310 and is therefore more comfortable to walk on. TSL™ 400 is a sound-absorbent nonwoven with a slip coating on the upper side and a 0.2 mm vapor barrier made of PE sheeting laminated to the rear side.

It complies with standards EN ISO 717-2 (impact sound improvement) and DIN EN ISO 12572 (vapor permeability).

### Functions

- ✓ Reduces impact sound
- ✓ Sound absorbent
- ✓ Vapor barrier

### Advantages

- ✓ Sound absorption and vapor barrier in one product
- ✓ Fast installation (no adhesives)
- ✓ More comfortable to walk on

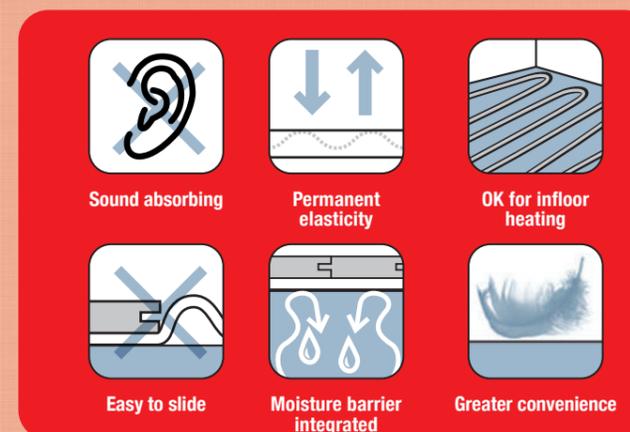

**IMPORTANT:** Do not install TSL™ 400 on subsurfaces made of organic material (carpeting, chipboard, etc.).

### Certifications and quality controls

### Strengths

- ✓ Greater convenience
- ✓ Lw = 20 dB
- ✓ Vapor barrier
- ✓ Suitable for infloor heating
- ✓ 20 cm overlapping PE sheeting

**For further information**  
please see the datasheet at  
[www.landolt.com](http://www.landolt.com)

[www.landolt.com](http://www.landolt.com)

Indoor Solutions, Version 7.0, EN

# TSS™

## TS Silent™ is the ideal product for absorbing impact and drum sound.

TSS™ comprises a natural rubber core, face with laminated protective slip-coating, rear side with laminated nonwoven. Especially suitable for floating parquet and laminate flooring.

### Functions

- ✓ Reduces impact sound
- ✓ Sound absorption

### Advantages

- ✓ Suitable for laying on textile floor coverings and other organic materials

### Certifications and quality controls

### Strengths

- ✓ Lw = 18 dB
- ✓ Suitable for infloor heating

Sound absorbing

Permanent elasticity

OK for infloor heating

Easy to slide

Permeable to water and vapor

For further information please see the datasheet at [www.landolt.com](http://www.landolt.com)

[www.landolt.com](http://www.landolt.com)

# TSSP™

## TS Silent™ plus combines impact and drum sound absorption with a vapor barrier for floating parquet and laminate flooring.

TSSP™ has a natural rubber core, face with laminated protective slip-coating, rear side with aluminium vapor barrier.

### Functions

- ✓ Reduces impact sound
- ✓ Sound absorption
- ✓ Vapor barrier

### Advantages

- ✓ One work step for two functions: sound absorption and vapor barrier
- ✓ Enhanced installation performance
- ✓ No additional effort needed to glue joints thanks to overlapping aluminium vapour barrier with bond strips

**IMPORTANT:** Do not install TSSP™ on subsurfaces made of organic material (carpeting, chipboard, etc.)

### Certifications and quality controls

### Strengths

- ✓ Lw = 20 dB
- ✓ Suitable for infloor heating
- ✓ Greater convenience

Sound absorbing

Permanent elasticity

OK for infloor heating

Easy to slide

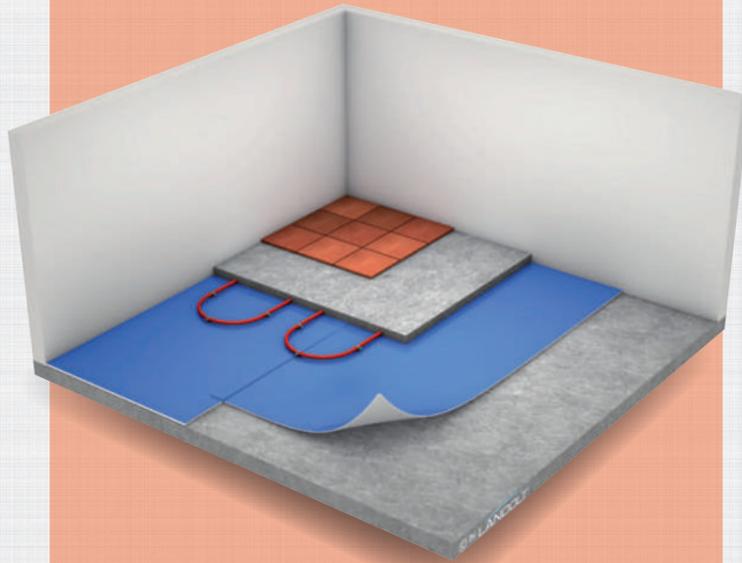

Moisture barrier integrated

For further information please see the datasheet at [www.landolt.com](http://www.landolt.com)

[www.landolt.com](http://www.landolt.com)

# TSU™ 550

**TSU™ 550 is a sound-absorbent nonwoven for floating sub-floors and screeds.**

The upper surface is laminated with a blue PE sheeting with a 10 cm overlap on one side.

### Functions

- ✓ For laying beneath cement subfloors and floating screeds
- ✓ Impact sound absorption with a minimum thickness (5.5 mm)

### Advantages

- ✓ Easy handling and laying
- ✓ 2-in-1 product – two work steps in one
- ✓ Extremely robust

### Certifications and quality controls

### Strengths

- ✓ Extremely robust
- ✓ High-quality PE sheeting
- ✓ Vapor barrier

Sound absorbing

Permanent elasticity

OK for in-floor heating

Moisture barrier integrated

### For further information

please see the datasheet at [www.landolt.com](http://www.landolt.com)

[www.landolt.com](http://www.landolt.com)

## ACOUSTIC AND TRICKLE PROTECTION SOLUTIONS

LANDOLT™

**The Contraphon™ family was developed to protect walls and ceilings from house dust and improve the acoustic properties of rooms.**

The Contraphon™ family comprises nonwovens for effective sound and trickle protection for walls and ceilings. They are lightweight and easy to install and are therefore the ideal solution for areas that are difficult to reach. Their open fibre structure improves room acoustics.

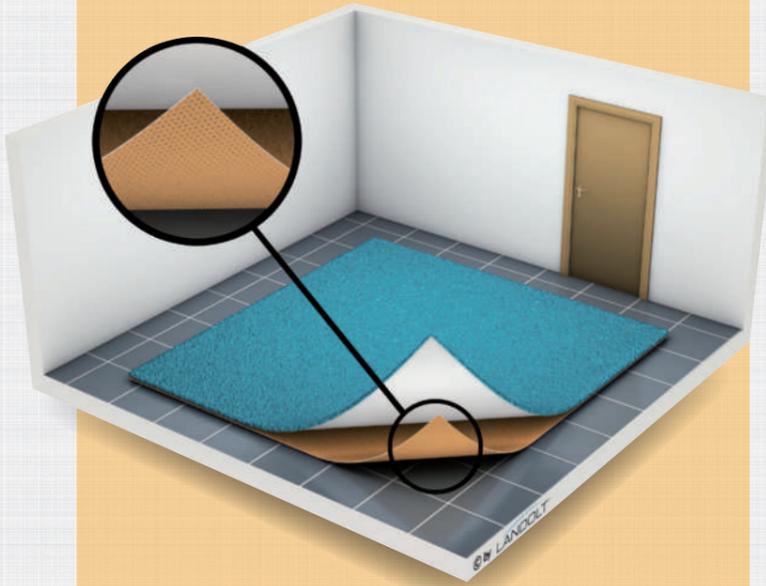

Allstop™ and Rug-fix™ form a complete range of rug underlays. These prevents rugs from wandering on any kind of floor surface

The exclusive Opticoat™ adhesive coating means Allstop™ and Rug-fix™ nonwovens are both non-slip and non-stick. They are easy to lay, easy to move, washable and do not contain any harmful volatile substances.

-  Sound absorbing
-  Opticoat™ coating
-  Non-slip underlay
-  Greater convenience
-  Washable up to 40°
-  OK for infloor heating

<b>Allstop™ classic</b>	•	•	•	•	•
Universal rug underlay					
<b>Allstop™ plus</b>	•	•	•	•	•
Rug underlay for heavy rugs and carpets					
<b>Rug-fix™</b>	•	•	•	•	•
The original with adhesion knobs. The unique rug underlay satisfying highest demands					

## Rug-fix™ is a non-slip rug underlay for the highest demands.

Its non-slip nubs increase underfoot comfort and provide the best possible safety.

### Functions

- ✓ Non-slip; reduces the risk of accident
- ✓ More comfortable underfoot
- ✓ Reduces impact sound

### Advantages

- ✓ Lightweight
- ✓ Easy and fast laying
- ✓ Washable up to 40°
- ✓ Usable on any smooth and textile floor covering

### Certifications and quality controls

### Strengths

- ✓ Washable up to 40°
- ✓ Suitable for infloor heating
- ✓ Non-slip nubs increase comfort and prevent slippage

Sound absorbing

Opticoat™ coating

Non-slip underlay

OK for infloor heating

Washable up to 40°

Greater convenience
