Floorliner™ vapor P

Vapor-transmitting nonwoven with absorbent paper on the rear side.

Floorliner™ vapor P is a nonwoven with an optimum vapor-transmitting PE sheet.
The sheet provides additional protection for floor coverings from liquids during the construction phase.
Ideal for covering and protecting newly laid floors. Floorliner™ vapor P allows rising moisture and solvents to evaporate.
The process is further supported by the absorbent paper on the rear side.

Floorliner™ vapor P provides optimum protection for your freshly laid floors and surfaces.
It is the best guarantee for handing over undamaged floors every time.

Functions

✔ Absorbent
✔ Vapor-transmitting (enables solvents, oil, paint and water vapor to evaporate)
✔ Impermeable to liquids (protects floors from liquids of all kinds during the construction phase)
✔ Residue-free

Applications

✔ Ceramic tile and natural stone floors
✔ Parquet flooring sealed or oiled on site
✔ Industrial flooring
✔ Dyed cement and screed flooring

ATTENTION: *Please observe the minimum drying times defined by the manufacturer before laying Floorliner™ vapor P. (A basic rule applies to surfaces laid during the construction perdiod: lay when ready to walk on).*
Switch off underfloor heating prior to laying. Lay Floorliner™ vapor P flush against walls and secure overlapping joints with commercially available adhesive tape.

Features

✔ Easy installation and disposal
✔ Economic storage (palletized)
✔ Easy to cut (with a Landolt knife for nonwovens)
✔ Absorbent
✔ Vapor permeable
✔ Liquid impermeable

Certification and quality control

ISO 9001
BUREAU VERITAS
Certification
N° CH10607D

MADE SWISS

Patent registered

Strengths

✔ **Protects newly laid floors and enables better evaporation of water (moisture) and solvents**

✔ **Completely residue-free, even with high residual moisture content**

Impermeable   **Fuzz resistant**

Extra robust   **Absorbent / vapor-transmitting**   **Breathable**
